Objectivity

23 November – 31 December 2024

Ikastikos Kiklos DL in collaboration with **DL Gallery** presents on **Saturday 23 November 2024** the solo exhibition "**Objectivity**" of Katerina Zafeiropoulou.

The exhibition comprises 11 wall-mounted works which form part of the collection of DL gallery and proposes to showcase and review the issues that have preoccupied the artist from 2014 to this day about our surrounding space and objects.

In this series of works, disparate everyday objects fill indoor and outdoor spaces, distorting the boundaries of the familiar. Linear compositions, pop-culture collages and transparent surfaces form eerie palimpsests.

Notions like accumulation, excessive consumption and cultural resources are turned into perforated fields that call upon us to immerse ourselves in vague settings and wander around unfamiliar places.

These contemporary urban landscapes are uncanny worlds that look like dense forests within the city, like overstuffed bookcases or like labyrinthine rooms that have turned into storerooms.
